Run 200amp underground electrical from shop to cold storage building.

Breaker box fully installed and secured in cold storage building.

Install at least 4 20 amp outlets per wall in cold storage building with 2 outlets per wall being dedicated circuits to prevent overloading.

Install underground circuit to salt storage shed from cold storage building with a light to be installed in each bay and one on the Southern facing exterior.

Install outlets above garage doors in recycling building.

Replace dusk to dawn light on all buildings with those similar to the lights on the shop of B&B Truck and Trailer located at 1460 Willow Springs Rd, Cobb, WI.

Add a light above the walk through door located on the Northeast corner of the shop.

Contractor to coordinate with building inspector for all necessary inspections.
